Summary

Aspiring Software Developer passionate about full-stack web development and problem-solving. Experienced in building scalable applications using React.js, Node.js, Express.js, and MongoDB. Comfortable with Git and team collaboration, with a strong foundation in Data Structures and Algorithms and backend development.

Experience

CrowdStrike — Frontend Developer Intern

Nov 2025 – Apr 2026

Worked as a Frontend Developer Intern at CrowdStrike, contributing to the development of responsive and scalable web applications using React.js, Redux, JavaScript, HTML, CSS, and Tailwind CSS. Built reusable UI components, integrated REST APIs, optimized application performance, and collaborated with the development team using Git and GitHub while following modern frontend development best practices.

AICTE–Google AI/ML Virtual Intern

Jan 2024 – Apr 2024

Completed a certified internship on machine learning using Python, focusing on data preprocessing, model building, and evaluation. Worked with Scikit-learn and Pandas to develop a mini-project predicting student performance. Gained hands-on experience with model metrics like accuracy, precision, and recall.

Education

Gayatri Vidya Parishad College of Engineering

B.Tech in Information Technology, SGPA: 8.33

Nov 2022 – June 2026

Visakhapatnam, India

Projects

EliteHire - Job Portal Web Application

GitHub

React.js, Node.js, Express.js, MongoDB, Redux Toolkit

- Developed EliteHire, a full-stack job portal with JWT authentication and role-based access for students and recruiters.
- Designed a scalable modular backend and built a job portal with search, filtering, pagination, job saving, and an admin dashboard for managing companies and job postings, with REST APIs tested using Postman.
- Implemented applicant management with resume uploads (Multer), ATS scoring, status actions, and integrated SMTP email with real-time updates for seamless communication and profile synchronization.

TrackFleet - Courier Tracking System

GitHub

HTML, CSS, JavaScript, Node.js, MySQL, Bootstrap

- Developed a full-stack TrackFleet with role-based authentication for users, administrators, and delivery personnel.
- Built shipment management modules with auto-generated tracking IDs, order history, and real-time status updates from booking to delivery.
- Created an admin dashboard for shipment creation, delivery assignment, status management, and secure database operations using MySQL.
- Designed a responsive interface with Bootstrap and developed RESTful APIs using Node.js and Express.js to ensure efficient communication between the frontend and backend.

Skills

Languages: Python, C++, JavaScript, HTML5, CSS, Typescript, Tailwind CSS

Frameworks & Technologies: React.js, Node.js, Express.js, MongoDB, MySQL, Redux Toolkit, Git, GitHub, Rest APIs, JWT Authentication, Postman, Django, Multer, Bootstrap, TensorFlow, Keras, Scikit-learn, OOPS, Open APIs

Soft Skills: Leadership, Teamwork, Problem Solving, Adaptability, Time Management, Creative Thinking

Achievements

- Secured 2nd position among 50+ teams in the college Design Thinking and Innovation hackathon.
- Solved 200+ problems on LeetCode (Global Rating: 1742) and participated in CodeChef contests (2 Star Coder).

Certifications

- NPTEL: Software Engineering – Covered SDLC, design patterns, and project management.
- HackerRank: Python Certification – Proved skills in core programming and problem-solving.
- Google AI/ML Tech Camp by EduSkills – Hands-on with TensorFlow, ML, and model deployment.
