Summary

Aspiring Software Developer passionate about full-stack web development and problem-solving. Experienced in building scalable applications using React.js, Node.js, Express.js, and MongoDB. Comfortable with Git and team collaboration, with a strong foundation in Data Structures and Algorithms and backend development.

Experience

CrowdStrike — Frontend Developer Intern Nov 2025 – Apr 2026

Worked as a Frontend Developer Intern at CrowdStrike, contributing to the development of responsive and scalable web applications using React.js, Redux, JavaScript, and Tailwind CSS. Built reusable UI components, integrated REST APIs, optimized application performance, and collaborated with the development team using Git and GitHub while following modern frontend development best practices.

AICTE–Google AI/ML Virtual Intern Jan 2024 – Apr 2024

Completed a certified internship on machine learning using Python, focusing on data preprocessing, model building, and evaluation. Worked with Scikit-learn and Pandas to develop a mini-project predicting student performance. Gained hands-on experience with model metrics like accuracy, precision, and recall.

Education

Gayatri Vidya Parishad College of Engineering Nov 2022 – June 2026
B.Tech in Information Technology, SGPA: 8.33 Visakhapatnam, India

Projects

EliteHire - Job Portal Web Application Live Demo

React.js, Node.js, Express.js, MongoDB, Redux Toolkit

- Developed EliteHire, a full-stack job portal with JWT authentication and role-based access for students and recruiters.
- Designed a scalable modular backend and built a job portal with search, filtering, pagination, job saving, and an admin dashboard for managing companies and job postings, with REST APIs tested using Postman.
- Implemented applicant management with resume uploads (Multer), ATS scoring, status actions, and integrated SMTP email with real-time updates for seamless communication and profile synchronization.

ApexPredict - Predictive Maintenance ML SaaS Platform Live Demo

Python, FastAPI, Next.js, PostgreSQL, XGBoost, LightGBM, SHAP

- Built a production-grade full-stack ML SaaS platform with FastAPI (Python) backend and Next.js (React) frontend, deployed on Render and Vercel with PostgreSQL database integration via SQLAlchemy ORM.
- Trained XGBoost/LightGBM binary classification models with high ROC-AUC scores and integrated SHAP explainability to deliver real-time feature importance insights per prediction.
- Implemented JWT-based authentication with bcrypt, role-based access control, and configured end-to-end CI/CD pipeline via GitHub with CORS security and production-ready API documentation.

Skills

Languages: Python, C++, JavaScript, HTML5, CSS, TypeScript, Tailwind CSS, SQL

Frameworks & Technologies: React.js, Next.js, FastAPI, Node.js, Express.js, MongoDB, PostgreSQL, MySQL, Redux Toolkit, Git, GitHub, REST APIs, JWT Authentication, Postman, Multer, Bootstrap, TensorFlow, Keras, Scikit-learn, OOPs, Open APIs

ML & AI: XGBoost, LightGBM, SHAP, Pandas, NumPy, Matplotlib, Seaborn, Predictive Maintenance

Cloud & DevOps: Render, Vercel, GitHub CI/CD, Docker (basics), Environment Management

Soft Skills: Leadership, Teamwork, Problem Solving, Adaptability, Time Management, Creative Thinking

Achievements

- Secured 2nd position among 50+ teams in the college Design Thinking and Innovation hackathon.
- Solved 200+ problems on LeetCode (Global Rating: 1742) and participated in CodeChef contests (2 Star Coder).

Certifications

- NPTEL: Software Engineering – Covered SDLC, design patterns, and project management.
- HackerRank: Python Certification – Proved skills in core programming and problem-solving.
