Summary

Dynamic Software Engineer specializing in architecting highly scalable full-stack systems (MERN, Next.js) and integrating advanced machine learning pipelines. Demonstrated success driving frontend optimization at CrowdStrike and engineering enterprise-grade ML SaaS platforms from the ground up. An elite algorithmic problem solver (LeetCode Global Rating: 1742) dedicated to designing robust backend architectures and delivering frictionless, high-performance user experiences.

Experience

CrowdStrike — Frontend Developer Intern Nov 2025 – Apr 2026

Engineered highly scalable, enterprise-grade web applications leveraging React.js, Redux, and Tailwind CSS. Architected reusable UI component libraries and seamlessly integrated complex RESTful APIs to accelerate feature deployment. Drove frontend optimization initiatives that significantly improved application performance, while enforcing modern code quality standards and agile best practices via GitHub.

AICTE–Google AI/ML Virtual Intern Jan 2024 – Apr 2024

Designed and evaluated predictive machine learning models utilizing Python, Scikit-learn, and Pandas to forecast complex performance metrics. Engineered robust end-to-end data pipelines, encompassing advanced data preprocessing, feature engineering, and statistical analysis. Optimized algorithmic performance by fine-tuning models against core evaluation metrics—including precision, recall, and accuracy—to ensure high predictive validity.

Education

Gayatri Vidya Parishad College of Engineering Nov 2022 – June 2026
B.Tech in Information Technology, SGPA: 8.33
Visakhapatnam, India

Projects

EliteHire - Job Portal Web Application Live Demo

React.js, Node.js, Express.js, MongoDB, Redux Toolkit

- Architected a comprehensive full-stack hiring platform with secure JWT authentication and Role-Based Access Control (RBAC), delivering tailored dashboards for both job seekers and enterprise recruiters.
- Engineered an advanced Applicant Tracking System (ATS) featuring automated candidate evaluation, Multer-driven resume processing, and an integrated SMTP pipeline for real-time hiring status communications.
- Designed a highly scalable RESTful backend supporting dynamic job discovery with complex multi-parameter filtering, structured pagination, and administrative CRUD operations for seamless company management.

ApexPredict - Predictive Maintenance ML SaaS Platform Live Demo

Python, FastAPI, Next.js, PostgreSQL, XGBoost, LightGBM, SHAP

- Built a production-grade full-stack ML SaaS platform with a high-performance FastAPI backend and Next.js frontend, deployed across Vercel and Render with PostgreSQL integration via SQLAlchemy.
- Trained XGBoost and LightGBM binary classification models with high ROC-AUC scores, integrating SHAP explainability to deliver real-time, interpretable feature importance insights per prediction.
- Implemented robust API security using bcrypt and JWT validation, configured end-to-end GitHub CI/CD pipelines, and enforced CORS policies alongside production-ready API documentation.

Skills

Languages: Python, C/C++, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend & UI: React.js, Next.js, Redux Toolkit, Tailwind CSS, Bootstrap

Backend & Databases: Node.js, Express.js, FastAPI, PostgreSQL, MongoDB, MySQL, RESTful APIs

AI, ML & Data Science: TensorFlow, Keras, Scikit-Learn, XGBoost, LightGBM, Pandas, NumPy, SHAP

Tools & Cloud (DevOps): Git, GitHub Actions (CI/CD), Docker, Postman, JWT Auth, Vercel, Render

Core Competencies: Cross-Functional Leadership, Agile Collaboration, Analytical Problem Solving, Strategic Execution

Achievements

- Secured 2nd position among 50+ teams in the college Design Thinking and Innovation hackathon.
- Solved 200+ problems on LeetCode (Global Rating: 1742) and participated in CodeChef contests (2 Star Coder).

Certifications

- NPTEL: Software Engineering – Covered SDLC, design patterns, and project management.
- HackerRank: Python Certification – Proved skills in core programming and problem-solving.
